

Interview Transcript

JASMINE: My name is Jasmine Twillie, and today's date is the 3rd of April 2021 today we are in San Antonio Texas and I will be here interviewing my twin sister:

JADA: Jada Twillie

JASMINE: So, when were you born?

JADA: 2001, December 11th, 2001.

JASMINE: Where are you born?

JADA: Covington. I (we) lived in Mississippi all the way up until like 8th grade and then moved to Texas.

JASMINE: What is your occupation or what was your occupation?

JADA: A former student, still a student actually. I have always been a student. I write casually in the background. I have one famous fan fiction that I wrote when I was like 13. It is the worst thing ever...

JASMINE: I see. That is very interesting. So, when and how did you 1st hear about the coronavirus? Explain your experience.

JADA: Well, I was actually watching a stream by the youtuber name. Mr. Metokur. It was the stream called the JIMCAST where he was talking about the coronavirus. This is like before anything happened, or anything went down. Like watch Corona chance coming to get you like ha obviously not being more major than it was

JASMINE: Can you explain how the coronavirus has affected your daily or weekly routine like shopping or grocery shopping or spending time with your family?

JADA: Well, honestly, before the coronavirus I enjoyed spending time with my sister (you) after the coronavirus I enjoyed spending more time with my sister (you) simply because I just now realized that I everybody else in my family kind of sucks.

JASMINE: Did the pandemic were you able to work for home from home why or why not?

JADA: We were able to work from home however, since a lot of my professors did not know how to properly communicate or use many of the online portals, it was a couple of confuse so...

JASMINE: Do you know anyone who that has been affected by the coronavirus?

JADA: Ah, yes actually my friend is old suite mate. She said it literally "It felt like having an allergy", and she was fine she just took some Theraflu.

JASMINE: How is adapting to the current a virus affected your work/school responsibilities?

JADA: Well, I must make sure to go online. I used to be able to rely on just seeing the professors in class now, I must do online I make sure to check my calendar in all my due dates every single day.

JASMINE: I see, so along with that we also were hit by a Winter storm. When you were hit by the by the Winter storm, did you think about the virus?

JADA: I was focused on the fact that it was snowing in Texas. I may not just because I know that like, as a person who seen like the effects of the coronavirus on people close to me, even people with like underlying conditions, it was not as bad as people made it out to be. So is more focused on like power outages, Internet outages, etc., etc. You know,

focusing on where I was gonna get food because the campus cantina has not a very large variety.

JASMINE: What would you like to tell future generations about the pandemic?

JADA: Corona flew down on its not the Spanish flu. It is nowhere near as deadly. Save food in your house not in like to a prepper extent but have food in your house. And do not live in urban areas because obviously that helps you spread the disease more so that's about it.

JASMINE: Anything you would like to say about creative pursuits during the pandemic?

JADA: I continued running like normal, but I recommend that if someone is completely uncreative and they have no creative outlets, start them so that you have something to look for your emotions because if you do not end up killing yourself during a Pandemic.

JASMINE: Thank you.

JADA: Your welcome.
